

# Compound Pharmacy Marketing

**MORE DOCTORS. MORE COMPOUNDS. MORE MONEY.**

Renee Yvonne

## What I Do

I help compounding pharmacists who love what they do but don't love marketing their business. Through my coaching, I help you gain clarity in your marketing goals, learn to consistently market your business and develop systems that help you attract and maintain patients and prescribers. In fact, you will find that you actually enjoy rather than dread marketing.

## Workshops

**How to Market to Specialty Practices:** Learn the techniques to market to specialty doctors such as pediatricians, dentists, oncologists and more!

**Marketing for Pharmacists Who Hate to Market:** This workshop is for the pharmacist who knows they need to market but would rather pay taxes than go talk to doctors.

**Fill More Compounds:** The complete marketing system for planning your marketing, talking to doctors, connecting with patients and ultimately filling more compounds.

## In My Clients Words

"I have a doctor in town that I have known for years but he writes very little compounds for me. Renee came into town and I decided that we would see him. Within a few minutes she had the doctor telling her about his practice and even designing his own compounds. It was amazing! When we left we had 4 new compounds that he wanted to try. She is a marketing guru. ~

**Sam Ching, Reliable Drug"**
